

Substructure

Passing
over the span
is possible
by intention

a plurality of parallel, adjacent, poured-in-place tunnels,
each tunnel including a transverse drive aisle

drive aisle
openings in said
first tunnel walls
(being wider
than said drive
aisle)

first tunnel walls
having a
first length

second length

each first tunnel wall
separated from another
first tunnel wall by

a pair of second tunnel
walls

1ST FLOOR PLAN - GARAGE

FIG. 1

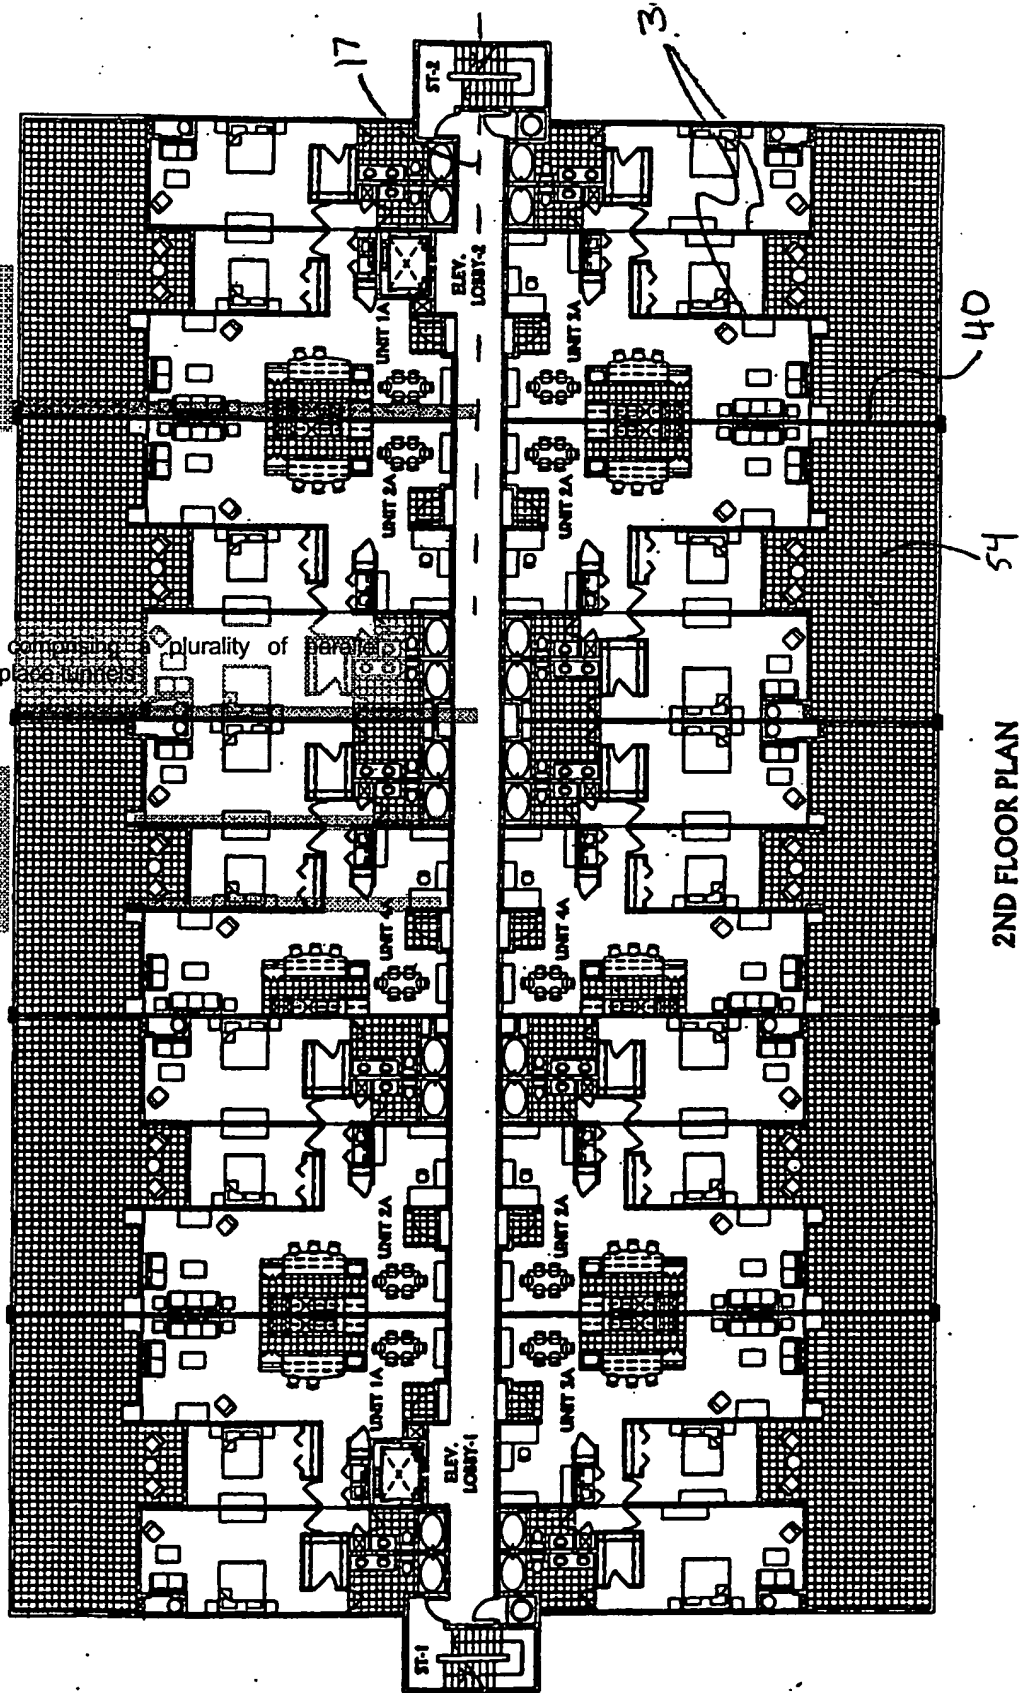

Interface Level

third tunnel walls
vertically aligned with
said first tunnel walls
and having a third
length

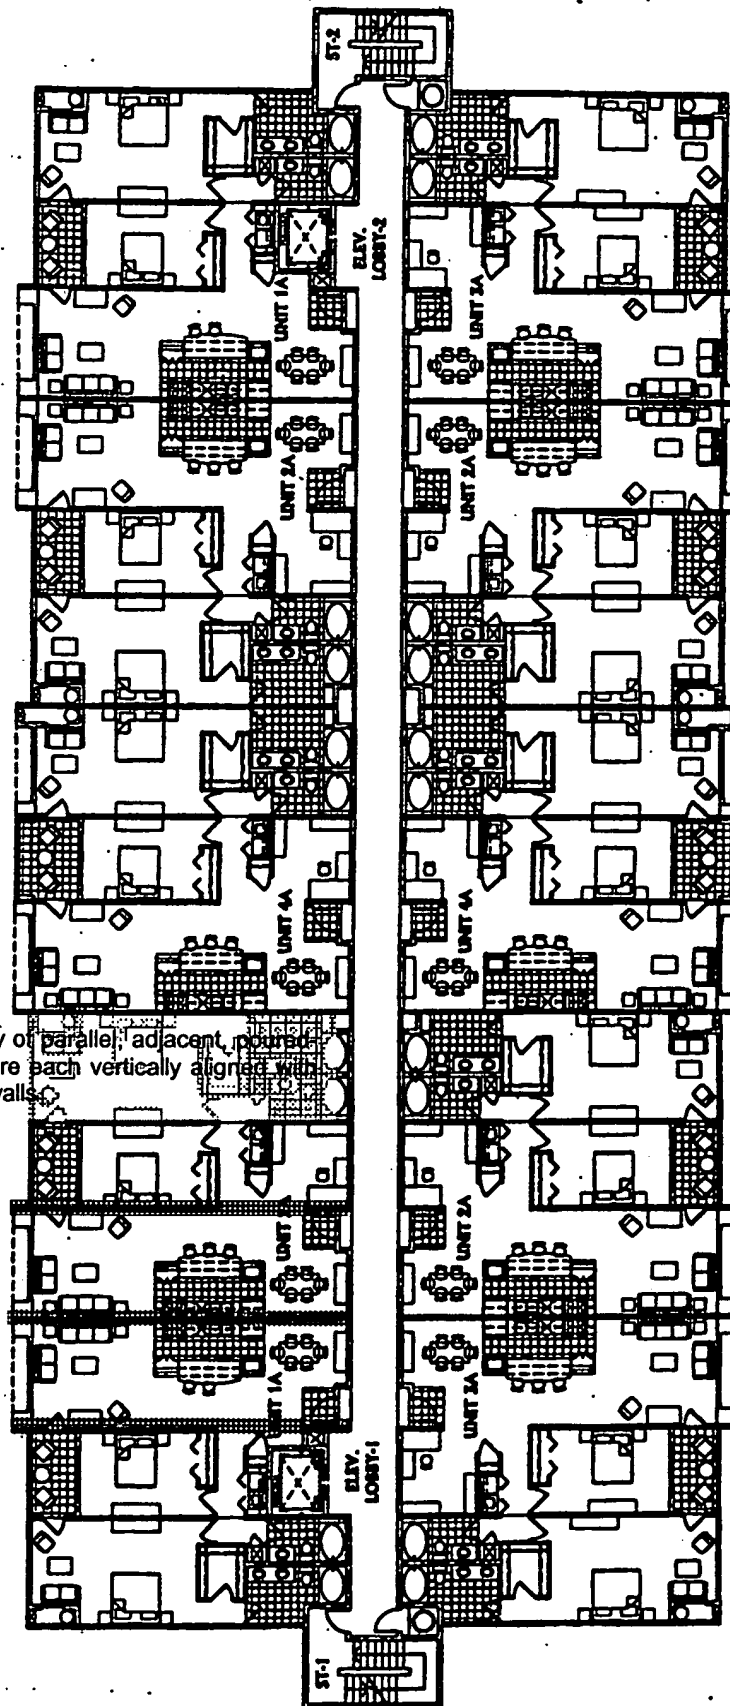

an interface level comprising
adjacent, poured-in-place tunnels

fourth tunnel walls
vertically aligned with
said second tunnel
walls and having a
fourth length

Superstructure

3RD FLOOR PLAN

FIG. 3

superstructure comprising a plurality of parallel, adjacent, poured in-place tunnels having walls that are each vertically aligned with one of said first and second tunnel walls.

Color-coded Schematic Corresponding to Figures 5 and 6
